EDUCATION

University of Mines and Technology (UMaT) – Tarkwa, Ghana   (November 2023)
Bachelor of Science Computer Science and Engineering *(First Class Honors)*

Relevant Coursework: Data Structures and Algorithms, Web Programming, Human Computer Interaction, OOP with C++, Software Engineering.

TECHNOLOGIES

Languages: Javascript, Typescript, Python, Java, PHP, C++ & C#.
❖ **Worked With:**
   o   Frameworks: React, Angualar, NextJS, React Native, Nodejs, Express.
   o   Databases: SQL (MySQL, PostgresQL, PlanetScale), NoSQL (MongoDB)

❖ **Tech Stack (Others):**
   o   Sound knowledge in Wordpress and Ampps / Xampps.
   o   Sound knowledge in Visual Studio and Github.
   o   UI/UX Design using Figma
   o   Effective use of MS Suite
   o   Arudino
   o   Certified in CyberSecurity (ISC2)

❖ **Soft Skills:**
   o   Problem solving, time-management, adaptability, leadership, teamwork & good communication skills.

EXPERIENCE

Inngen – Ghana   November 2023 – Present
NSP (Software Engineer)
❖ Successfully undertook a certificate training program on "Managing the Workplace for Improved Productivity" delivered by the Management Development and Productivity Institute, Ghana (MDPI).

Fusionelle Consult Limited – Ghana, Remote   January 2020 – Present
Fullstack Developer
❖ Developing interactive and responsive user interfaces, leveraging ReactJS framework to create dynamic and efficient web applications that meet our project's specific requirements and deliver a seamless user experience.
❖ Building robust and scalable server-side applications by leveraging the features and capabilities of ExpressJs to create efficient APIs and web services, ensuring seamless data communication and optimal performance in our software projects.
❖ Employing the capabilities of React Native framework in mobile development to craft versatile and powerful applications for various platforms efficiently and effectively.
❖ Thoroughly testing applications to guarantee their functionality, security, and performance, ensuring they meet both industry standards and user requirements.

QFace Group Ghana – Ghana, Remote   March 2022 – May 2022
Frontend Engineer
❖   Programming with C# and Blazor to develop a web application. I used Blazor's component-based architecture and C# to create interactive and responsive web interfaces, ensuring a seamless and efficient user experience for our application

Freelancer – Upwork, Remote   *Present*
Software Developer
❖   Coordinating with clients to transform ideas into code.

PROJECTS

Frontend Master Invoice App - Frontend, Backend, Demo
❖   The challenge is to build out this invoicing application and get it looking as close to the design as possible.
❖   *Technologies:* React, Javascript, Bootstrap

Circlesplit & Megastore – https://www.circlesplit.com
❖   Thoroughly testing Circlesplit (Payment Platform) & Megastore (E-commerce) app to guarantee their functionality, security, and performance, ensuring they meet both industry standards and user requirements.
❖   *Technologies:* React Native, Express

Customer Care App – *N/A*
❖   Built a native app that is used by customer care agents to handle requests by users on an ecommerce application (Megastore)
❖   *Technologies:* React Native, Expo, NativeWind

CAMPUS INVOLVEMENT

CodeNight, *Volunteer*, UMaT February 2021 – November 2023
❖   Help leading weekly all-night hackathon sessions that focuses on bridging the gap between what is learnt in class and the industry.

Other Activities
❖   Mentoring colleagues.
❖   Assist friends with assignments and projects.
❖   Provide IT Solutions for students.
